PROBLEM STATEMENT

High SME Failure Rate which is over 60% within the first year.

Data Overload & Wasted Insights which leaves thousands of customer reviews unanalyzed daily.

Guesswork Over Data which relies on gut feeling instead of quantified metrics for business decisions

Diner Decision Fatigue which is caused by misleading, one-dimensional 5-star rating averages.

SOLUTION OVERVIEW

To empower F&B SMEs and diners with an AI-driven decision intelligence platform that translates unstructured customer reviews into actionable, quantified revenue strategies and highly personalized dining recommendation

Data Ingestion & Aggregation

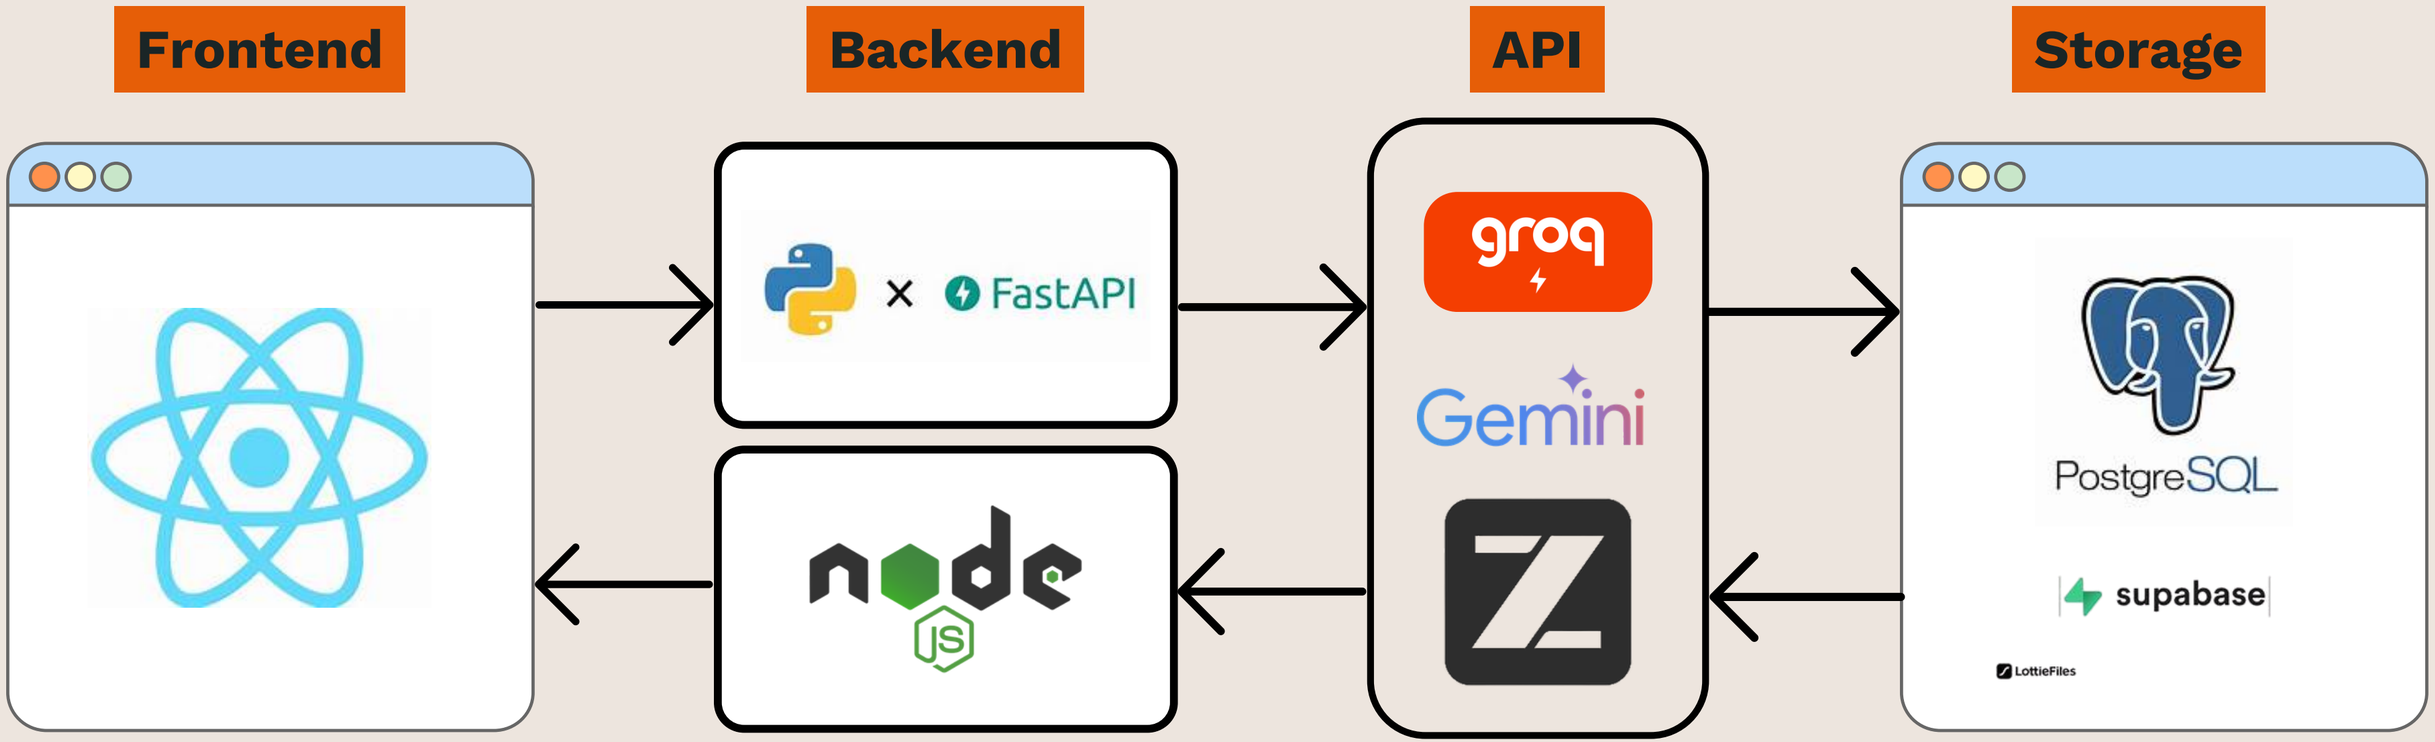
We centralize thousands of messy, unstructured customer reviews, automatically filtering and sending only the most relevant, up-to-date data to our AI so business owners no longer have to read them manually.

Dual-Sided Actionable Delivery

The system delivers tailored outputs for both users, providing vendors with a real-time performance dashboard, actionable directives, and a "What-If" revenue simulator, while offering diners highly specific, AI-justified restaurant matches with trade-off comparisons to completely eliminate decision fatigue.

Z.AI Decision Intelligence

Our FastAPI backend powers a structured Z.AI GLM engine that goes beyond simple summaries, acting as a virtual F&B consultant that understands local nuances to extract specific operational bottlenecks and calculate simulated revenue impacts.



TECHNICAL OVERVIEW

CORE FEATURES

Authentication & User Management

- Seamless Login
- Profile Storage
- Permanent Role Selection

Role-Specific Experiences

- Smart Routing
- Diner Capabilities
- Vendor Capabilities

Search & Interactive UI

- Real-Time Restaurant Search
- Chat with History
- Modern Visual Design

AI & Analytics Engine

- External LLM Integration
- Local Sentiment Model
- Graceful Fallbacks

IMPACTS

IMPACT	DESCRIPTION
ECONOMIC IMPACT (SME EMPOWERMENT)	**Revenue Protection:** Directly combats the 60% F&B failure rate by preventing revenue leakage caused by operational blind spots. **Democratizing AI:** Brings enterprise-level Business Intelligence (BI) and data science down to the budget of local, independent street-food vendors and cafes.
OPERATIONAL IMPACT (TIME & EFFICIENCY)	**Automated Analysis:** Saves restaurant owners 10+ hours a week that would otherwise be spent manually reading, categorizing, and guessing the meaning of online reviews.
CONSUMER IMPACT (DINER EXPERIENCE)	**Eliminating Decision Fatigue:** Saves diners time and frustration by replacing misleading 5-star averages with highly personalized, context-aware AI recommendations.
ALIGNMENT WITH SUSTAINABLE DEVELOPMENT GOALS (SDGS)	**Decent Work and Economic Growth:** Promotes the formalization and growth of micro, small, and medium-sized enterprises (MSMEs) through access to advanced technological services. **Industry, Innovation, and Infrastructure:** Fosters innovation by integrating cutting-edge LLM (Large Language Model) technology into the traditional, offline Food & Beverage industry.

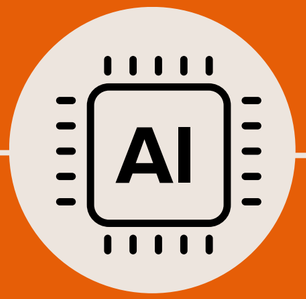
FUTURE ENHANCEMENT

ENTERPRISE MULTI-BRANCH SUPPORT

Enable franchise owners to link multiple store_ids to a single account for cross-branch comparison and aggregated AI analysis across an entire restaurant chain.

ADVANCED EDGE AI & SELF-HOSTING

Transition to self-hosted, fine-tuned local LLMs to eliminate third-party API costs, ensure 100% uptime, and maximize data privacy.



LIVE REVIEW API INTEGRATION

Implement continuous live-syncing with platforms like Google Maps and Yelp to process and evaluate new customer reviews in real-time.

FLEXIBLE ACCOUNT & ROLE MANAGEMENT

Introduce dynamic Role-Based Access Control (RBAC) so diners can seamlessly upgrade to vendor accounts and owners can create sub-accounts for their staff.

CONCLUSION

Review2Revenue is not just an analytics dashboard.

IT IS A GROWTH ENGINE THAT TRANSFORMS THE CHAOS OF CUSTOMER FEEDBACK INTO CLEAR, PROFITABLE DECISIONS—ENSURING LOCAL F&B BUSINESSES DON'T JUST SURVIVE, BUT THRIVE.

THANK YOU

FOR YOUR ATTENTION!
